

SOUNDLINK

Where underground electronic music meets community

Impact Business Plan - Investor Pitch

Nicolas Brett | ESADE Business School | 2026

INTRODUCTION

A quick note on the genre — and why I'm the one building this

What is minimal house?

A style of electronic music with fewer layers, more repetition and subtle changes pairing the grooves. It's a specific, devoted corner of underground electronic music, not mainstream EDM.

- Small clubs, intimate crowds — not festival culture
- Deep cultural identity: labels, DJs, sound become part of who you are
- Fans invest heavily — time, money, and identity in this scene

And I'm inside it — that's where this project came from

- I'm a minimal house DJ and producer myself
- I've felt this exact gap personally. The music connects me to a culture, but not easily to the people inside it
- This isn't a market I researched from the outside. SoundLink is the platform I wish existed, and that personal need is where the project started

THE PROBLEM

A niche, passionate audience — no social layer connecting them

Cultural disconnection

Connected to the music, disconnected from the people

Fragmented platforms

Spotify, RA, Instagram each serve one function but none truly connect

Closed circles

Studios, open decks and networks feel inaccessible

Validated on the ground in Barcelona

18 field interviews

Vinyl stores, event queues, studios & university spaces.
Direct conversations with avid listeners aged 18-35

6 venue conversations

2 underground clubs, 1 independent studio, 3 cafés/social clubs across Barcelona

44 survey responses

Distributed via personal network, DJ circles and music-related groups

15 of 18 interviewees would pay for a community platform if it feels niche, credible, and leads to real-life interaction.

MARKET QUANTIFICATION

A large market, narrowing to a defensible starting point

SOM is our target: SoundLink is not competing for a slice of the whole market — it's building the social layer none of these platforms provide, one dense city at a time.

TARGET & CUSTOMER VALIDATION

A targeted referral chain —

Every persona is chosen because they are already in the scene — and because they bring others like them.

The Artist

Pau, 24 · Engagement 10/10

The credibility anchor and first referral source. Targeted first because he both benefits from the platform and brings people like himself.

The Passionate Listener

Marina, 28 · Engagement 8/10

Already spends time and money in the scene. She just lacks the people. Recruited because she is positioned to refer others like her.

The Casual Listener

Alex, 21 · Engagement 3-4/10

Joins because someone already in the scene brought him. Not found through broad marketing, he arrives self-filtered, already fitting the target profile.

Organic, non-referral discovery is a bonus once density exists, not a growth assumption the model relies on.

THE SOLUTION

A journey through SoundLink

MVP

1. Discover

2. Learn

3. Connect

4. Engage

A local feed filtered by sub-genre, DJs and city.

Courses from real artists in the scene.

Profiles built around musical identity.

Direct conversations with people who get it.

REVENUE MODEL

Three revenue streams, one community flywheel

Subscriptions

€7.99/month

Grants standing, not access

Courses

10% commission

Artists sell content. Avg €25/course. High margin, zero added cost

B2B venue fees

€50/month per studio

Visibility for studios by discovering through SoundLink

The free tier keeps the platform's core promise: connection

No caps on feed, discovery, or messaging — gating connection would contradict the whole value proposition.

Free gives you the community. **Premium gives you standing within it** — visible status, hosting rights, courses, artist events and discounts. In a scene that already values recognition, this is a native incentive, not an artificial paywall.

GO-TO-MARKET PLAN

A referral chain through targeted members, not broad reach

Density before scale at every phase.

OPERATIONS

Lean, digital-first, low marginal cost per user

Infrastructure

React Native app, Firebase backend.
APIs: Spotify, Resident Advisor,
SoundCloud, YouTube.

Cost per user

€0.20-0.80/month cloud hosting. No
physical inventory, no logistics. Costs
scale slowly with growth.

Key processes

Onboarding, matching & feed
generation, content sharing, event
coordination, monetisation.

Capacity model

City-by-city expansion. No new city
launched until the current one reaches
500 active monthly users.

TEAM

The team executing this plan —

Nicolas Brett

Founder & CEO

- Product vision, community building, partnerships
- Personal network is the acquisition engine for Phase 1
- Initial funding and reinvestment

Freelance Developer

MVP build + ongoing maintenance retainer

Year 2: Community Manager

Planned hire. Reduces founder dependency,
scales onboarding

Why this team executes

- Cultural credibility can't be outsourced, it has to be lived
- Lean team keeps fixed costs low in Year 1
- Hiring scales with revenue, not ahead of it

FINANCIALS

Lean, capital-light, profitable in Year 1

Break-even: March (monthly) · November (cumulative)

User growth is the single make-or-break variable

Subscription and course revenue both depend on community density, they don't fail independently. If density undershoots by 50%, the business swings from a €1,302 profit to a €15,073 loss. If density runs 25% ahead of plan, profit grows more than eight-fold, to €11,121.

Looking ahead — self-funded, no capital needed before Y3 expansion

	Year 1	Year 2	Year 3
Cities	Barcelona	Barcelona	+ Madrid, Valencia
Revenue	€30,721	€56,000	€100,000
Net profit	€1,302	€12,000	€25,000

THE ASK

Self-funded in Year 1 — the ask, if we raise later

Sources of Financing

Founder equity

€15,000

Cash injection, committed

Deferred salary

€15,840

Internal financing as founder's own compensation reinvested

Friends & family

Contingency

Backstop only, not the planned round

Future round (Y3): €35K raise at €225K pre-money (4x Y2 revenue) = 12% equity

Allocation of Initial €15,000

MVP development

€12,000

Legal setup

€750

Marketing (Q1 buffer)

€1,250

Operating buffer

€1,000

80% of initial capital goes directly into the product itself.

RISKS, SAFETY & SCHEDULE

We know where this can break — and what we do about it

Critical

Community density

City-by-city expansion — no new city until 500 active MAU. This is THE risk everything else depends on.

High

Founder dependency

Institutionalise relationships, hire community manager Y2

High

Trust & safety

Group/public events by default; verified hosts for native meetups; most events pre-verified via RA

Schedule

SUMMARY

Why this is a compelling opportunity

Proven demand

Validated with 18 interviews, 6 venues,
44 surveys

Low capital need

€15,000 launches it. Fully self-funded
through Year 1

Strong unit economics

17.6x LTV/CAC is six times the industry
benchmark

Founder-market fit

Built by someone who lives inside the
exact culture it serves

Timing, culture, and capital efficiency line up. This is the moment to back it.

WHY THIS WORKS

This community already exists.
They already spend money on it.
They just don't have a hub.
SoundLink is that hub.

€30,721 revenue · 17.6x LTV/CAC · €15K to launch · profitable in Year 1

Nicolas Brett · investors@soundlink.com · Barcelona, Spain

Thank you. Happy to take your questions.

Appendix

APPENDIX A1 — FINANCIAL STATEMENTS

P&L, Cash Flow, Balance Sheet — Year 1 summary

P&L		
Total revenue	€30,721	
Total costs	€29,419	
Net profit	€1,302	
Cash Flow		
Initial funding	€15,000	
Closing cash (Dec)	€24,142	
Balance Sheet (EOY1)		
Total assets	€32,142	Cash + net MVP intangible
Total liabilities	€15,840	Deferred salary
Total equity	€16,302	Founder equity + retained earnings

APPENDIX A2 — SENSITIVITY ANALYSIS

The combined cascade — and what moves the needle least

	Density fails	Base case	Density exceeds
Total users (Dec)	996	1,992	2,490
Subscription revenue	€6,582	€13,164	€16,455
Course revenue	€3,264	€13,057	€19,585
Venue revenue (insulated)	€4,500	€4,500	€4,500
Net profit / loss	-€15,073	€1,302	€11,121

Impact ranking (downside)

1. User growth

-€15,361

2. Course conversion

-€6,528

2. Subscription conversion

-€6,582

3. Marketing (2x spend)

-€4,500

4. Venue growth

-€1,650

APPENDIX A3 — LTV & CAC METHODOLOGY

How the 17.6x ratio is built, component by component

Component	Value	Basis
Monthly subscription price	€7.99	Premium tier
Average retention	12 months	Identity-driven audience; validated range 6-10mo, extended for community lock-in
Subscription revenue / paying user	€95.88	€7.99 × 12
Course revenue contribution	€1.25	50% engaged × 10% conversion × €25
Venue fee contribution	€2.26	€4,500 / 1,992 users
Total LTV (paying user)	€99.39	Sum of components
CAC (paid users)	€5.65	€4,500 marketing / 797 paid-driven users
LTV / CAC	17.6x	vs. 3x industry benchmark

APPENDIX A4 — RISK DETAIL

Preventive vs. corrective actions, with early warning indicators

Risk	Preventive	Corrective	Early warning
Community density	City-by-city rule; no expansion until 500 MAU	Targeted in-person campaign; referral incentives	MAU growth <10% for 2 months
Founder dependency	Written partnership agreements from day one	Accelerate community manager hire	No acquisition w/o founder for 30+ days
Developer dependency	Documented codebase; backup developer identified	Engage agency for emergency maintenance	Downtime >4hrs / bug unresolved >48hrs
Course adoption	Prioritise high-credibility artists first	Pivot courses to free community feature	Course revenue <50% of plan at month 3
Trust & safety	Group/public events default; verified hosts	Incident response protocol; 72hr notification	Any verified unsafe interaction report
